ABOUT US

Maximising commercial value and outcomes for society

In today’s business climate an organisation’s projects, programmes and portfolios need to be extremely efficient, exceptionally reliable and highly value-creating. Ramboll’s trusted and experienced team deliver certainty, remove ambiguity and maximise the best possible outcomes and value against ambitions.

We are highly regarded collaborators and trusted partners. Ramboll’s distinguished heritage and culture, together with strongly rooted core values and a clear sense of purpose, ensure that successful collaborative behaviours are in our DNA. As a Foundation owned business that is able to take the long-term view, we have deep and enduring relationships with our clients. We provide consistent teams and these familiar faces breed a deep understanding of our client’s businesses and requirements, whilst ensuring all our undertakings create maximum value and deliver the best possible outcomes for society.

Trusted partners delivering dynamic certainty

We know that certainty is crucial and isn’t static. We focus on ensuring that, at any point in time, we know where projects are and where they are going to end up. We take a dynamic, agile and collaborative approach focused on absolute transparency and certainty. This means we identify the early warnings and, should the need arise, take action to get back on track. There are no surprises and no risks left unattended. We are your trusted delivery partners. We deliver dynamic certainty.

Our team bring all the technical expertise and experience you would expect from a leading provider of project, programme and portfolio management services. We will confidently manage all the complexities, interdependencies, risks and conflicts that come with large undertakings and will stand out in our ability to integrate and unify teams, to create an atmosphere of trust and transparency, and to deliver confidence, certainty and success.

OUR MISSION:
Create sustainable societies where people and nature flourish.

PROJECT CONTROLS CYCLE
Globally recognised best practice
We are recognised as having established international best practice. Our ISO certified Project Excellence Platform has corporate accreditation from the Association for Project Management (APM), the largest member organisation within the International Project Management Association (IPMA). As a recognised digital pioneer, our platform allows us to be adaptable and transformative in the way we collaborate, communicate and work with clients.

Consistent teams
We bring together the right people and teams, processes, documents and tools needed to deliver outstanding project outcomes. Our consistent client teams develop a deep understanding of our clients’ drivers and activities. We utilise the advantages and advancement digitalisation enables in enjoying transparent and open communication across borders, with the instant transfer of information and optimised management of documentation.

Strong collaborative behaviours
We are one of very few large consultancies to be privately owned. This provides great stability and enables us to invest more deeply in employees and client relationships. Our Nordic heritage has fostered a culture that values excellence, innovation, collaboration, trust and empowerment. The result is a consistent set of behaviours that make us transparent and trustworthy, positive team players, and determined to deliver the best outcomes.

Maximising sustainable outcomes
As a socially conscious business with a mission to ‘create sustainable societies where people and nature flourish’, we bring unique insights to maximise sustainable outcomes and value creation for our clients, their customers and society. This focus stems from our founders, Børge Rambøll, a visionary humanist, and Johan Hannemann, a technically gifted engineer. Together they wanted to create a responsible company focused on developing sustainable societies.

**FOUNDE**
Rambøll & Hannemann set up a responsible company in Denmark in 1945 to help rebuild society following the Second World War. Rambøll is now a large respected global organisation of 15,500 people but are still guided by our founding principles.

**LOMBOK**
Rambøll supports many humanitarian projects. In response to the devastating earthquakes in Lombok in 2018, Rambøll collaborated to develop a blueprint for safe, affordable and attractive housing using locally sourced bamboo.
Amager Bakke is one of the world’s most energy efficient waste-to-energy plants with net energy efficiency of 107%. Ramboll acted as Owners Engineer, involved from the very beginning and provided project planning and definition, conceptual design, tendering, procurement, project and contract management, supervision and commissioning. Uniquely, ski slopes and climbing walls are integrated into the facility to bring recreational value to the city it serves.

Deep technical reach
Ramboll is a 15,500 strong global engineering, design and consultancy company regarded for our technical excellence and innovative approaches. We have all the technical depth needed to deliver some of the most complex, iconic and innovative projects, from the world’s longest road and rail tunnel connecting Denmark and Germany, to the world-famous Tate Modern gallery in the UK. We are able to quickly access this technical advice to inform project and programme delivery.

Recognised digital pioneer
Ramboll is a pioneer and leader in maximising the digital design and offsite construction potential in projects and know how to integrate such approaches to accelerate project timelines and manage costs. We also know how to automate appropriate parts of our service delivery to ensure our time is focussed on the high value areas and know how to use digitalisation to transform the way we work, collaborate and communicate to ensure efficient and effective project delivery.

Leading EHS consultancy
We have been trusted to develop and manage EHS programmes for the operations of many global blue-chip companies as well as on iconic projects. Our experience in managing complex EHS issues means we know how to effectively achieve compliance and reduce risks and liabilities, as well as creating economic value and competitive advantage. A rigorous EHS focus is critical in any undertaking and we bring this expertise to bear in our project and programme management approaches.

In-house management consultancy
Uniquely, Ramboll has a 500-strong dedicated management advisory business who regularly form part of multidisciplinary teams to deliver our project and programme Management services. They provide valuable input to a projects business cases, providing dynamic optioneering and project selection services, as well as socio-economic studies and analysis on the consequences of policy and project interventions on the economic, environmental and social aspects of society.

Few can bring the breadth and depth of project, programme and portfolio services together with the technical reach and innovative spirit that we can.
Operating across the full project, programme and portfolio management lifecycle, Ramboll is able to provide a comprehensive set of advisory and delivery services across a wide range of markets and environments. Whether in monitoring and reporting the progress of your projects and programmes across your portfolio, or consistently embedding transformational change, we can bring certainty of project outcomes and create value for your stakeholders.

Project and Programme Management (PPM)
Whether it be advising how best to reduce project uncertainty in the built environment, implementing a business change programme to drive your strategies or consolidating and driving consistency across your portfolio, we have a range of advisory and delivery services that can bring value to your projects and programmes.

Portfolio Management
Our portfolio management services can reassure you that your projects and programmes are appropriately selected, aligned with your strategic objectives, that performance and progress is monitored and reported, and that there is optimised organisational capacity as they deliver the best possible outcomes and return on your investments.

Project Management Office (PMO)
Ramboll can define, design and deliver PMO’s that allow your projects, programmes and portfolio’s to be supported in the right way, at the right time and with the right services. This ensures there is a connection between strategy and delivery, a sharp focus on realising benefits, and that resources are optimised to allow the PMO the best possibility of achieving success.

TATE MODERN
The new Tate Modern extension (the Blavatnik building) is an iconic world-class addition to London’s skyline. It pushes the boundaries of modern design and engineering. From its one-of-a-kind geometric structure to its striking brick façade, every facet of this building has been planned and engineered with staggering accuracy. Image: Daniel Shearing.
Located on a mountaintop in Chile, the Extremely Large Telescope (ELT) will be the largest optical telescope ever made. The revolutionary telescope being built by the European Southern Observatory (ESO), will gather more light than all the existing telescopes on the planet combined and will enable astronomers to search for extra-terrestrial life in 10 years’ time. Since 2013 Ramboll has served as technical advisor to ESO, supporting them in the procurement and contract administration of the construction and design of the telescope’s dome and main structure.

Change and transformation programmes
Ramboll identifies business needs and objectives, assesses preparedness for change, provides options and expertise to lead on developing, planning and implementing transformational change, and will identify, realise and measure the benefits of your transformation intended.

Management advisory
Our experts will share their experience and insights to provide impactful management advice, whether that be empowering project engagement strategies through stakeholder intelligence, advising on the impacts of policy interventions on environmental or social aspects, or providing meaningful data to support business case development.

OUR SERVICES
STRATEGY & ASSURANCE

Ensuring the objectives of projects, programmes and portfolios are clear, governed, aligned to strategies, with the right processes supporting them, is key to their ultimate success and providing confidence to stakeholders. Whether projects in the built environment or a major change transformation, Ramboll’s advisory and delivery services reassure clients and stakeholders that projects have been set up for success and will deliver.

Assurance
Ensuring management plans are robust and auditable, that processes and functions supporting your projects are adequately monitored and controlled is key to success and stakeholder confidence. Ramboll offers independent, impartial and practical advice on the quality of your management plans and the deployment of the right levels of governance to assure success.

DOHA METRO GREEN LINE,
Ramboll is supporting Qatar’s ambitious plans for a rail-based public transport network in Doha and was the Design Verification Engineer providing independent certification of the works spanning stations, switchboxes, escape shafts and twin bored tunnels.

- Number of jobs created: 4,000
- Tonnage of contaminated material recovered: 17
One of Liverpool’s most important regeneration projects this decade is to enhance the city’s capabilities in handling the next generation of turnaround cruise ships, which can carry up to 3,600 passengers. Liverpool City Council is creating a state-of-the-art passenger and baggage facility, complete with passport control, lounge and café, with a new landmark terminal building being suspended on a deck over the river. Ramboll is leading a multi-disciplinary technical team designing the new terminal and hotel and will stay involved until scheme completion.

PROJECT IN NUMBERS

- **60**
  In 2017 the city welcomed 60 vessels, with 120,000 passengers and crew

- **£7M+**
  Current terminal generates £7M+ to the city’s economy

- **20**
  Ramboll brings over 20 years’ experience in cruise terminals
We bring our focus and passion for successful value-creating projects and programmes through the project services we provide. We are experienced in implementing best practice and deploying expert services spanning risk and construction management, commercial and contract management, and project controls.

Risk and Issue Management
Ramboll provides an unparalleled range of pre-emptive and responsive risk and issue management services. These include providing expertise to manage your projects’ risk process, facilitating project risk and opportunity workshops to identify and analyse potential risks and opportunities.

Engineering and Construction Management
Ramboll has impressive expertise spanning the built environment, including construction, civil engineering and industrial project environments. Whether undertaking design management services for a new building, providing technical and environmental due diligence, or conducting cost estimates, we can ensure construction project challenges are overcome.

Commercial, Contracts and Project Controls
We establish and deliver effective commercial, contractual and project controls. From advising on benefits and drawbacks of contract types, ensuring project controls are deployed, to developing commercial and contract strategies, we have the expertise to deliver project value and success.

HS2
Ramboll is supporting several packages of works on High Speed 2 (HS2) in the UK, including the Enabling Works on the Northern and Southern sections of Phase 1, and forming part of the team acting as the Engineering and Environmental Overview Consultant on Phase 2b. Ramboll is also supporting the digitising of the railways in both Denmark and the UK, where in Denmark Ramboll is heading the consortium for upgrading the country’s entire signalling system.
The Queensferry Crossing is one of the most striking engineering icons of the twenty-first century. It is the UK’s tallest bridge and the world’s longest three-tower, cable-stayed bridge. Ramboll is proud to have led the Design Joint Venture (DJV) for main construction contractors Forth Crossing Bridge Constructors (FCBC), helping deliver the crossing and surrounding road approaches. The amazing innovation and collaboration needed to deliver this remarkable structure has been recognised with countless awards, including Project of the Decade and Outstanding Project in a Generation.
