PREVEZA-AKTIO LINK, IMMERSED TUNNEL

Project Description
The project includes an immersed tunnel for a two-tracked road between Preveza and Aktio. The total length of the link is about 4.7 km. The immersed part of each tunnel tube is 909 m and linked to a 150 m long cut & cover tunnel in one end and to a 500 m long cut & cover tunnel performed with diaphragm walls in the other end. The rest of the link consists of slip roads. The project includes service buildings, access roads and links to the regional network.

Scope of Services
The contributions include examinations of the design from the contractor and also supervision and construction management.
